RENZMANN ROTO 140 distiller,
stainless steel -
ready for continuous distilling.

The RENZMANN distillation units type ROTO recover contaminated solvents through continuously distillation.

A rotating scraper system permanently cleans the heat transfer surfaces; thus it is possible to distil even highly contaminated solvents or waste inks, to reduce the residue to a large extent, and to discharge it automatically.

Filling capacity: approx. 140 l
Vessel capacity: approx. 300 l

Distillation output: approx. 30-60 l/h
(depending on the solvent values may differ)

Electric heating: 9 kW
